Senior Azure Cloud Infrastructure & DevOps Engineer

Safiyullah S A

Address: Chennai, Tamil Nadu, 600118.
Contact: +91-8148696920 | Email**:** sasafiyullah@gmail.com

Professional Summary

Senior Azure Cloud Infrastructure & DevOps Engineer with 4+ years of experience designing, automating, and securing enterprise-grade Azure and Hybrid environments. Proven expertise in Infrastructure as Code (Terraform, PowerShell), CI/CD pipeline design, and cloud security measures. Recognized for driving operational excellence, including governance initiatives that saved $20K+ AUD in storage costs. Adept at creating technical documentation, runbooks, and architecture diagrams to streamline operations. Skilled in monitoring and observability solutions (Azure Monitor, Splunk, ServiceNow, Snow integration) that ensure 99.9% uptime and proactive incident resolution. Certified in Azure Administration, Networking, and Security, with a strong track record of aligning technical execution with business goals via ITIL frameworks and Agile methodologies.

Career Experience

Azure Cloud Operations Engineer | Wipro Technologies | *Sep 2021 – Nov 2025*

Core Responsibilities:

- **Infrastructure Management -** Provisioned and managed lifecycle for 2500+ Azure Virtual Machines, utilizing PowerShell scripts to automate generating reports which reduced manual maintenance time by 15 hours per month
- **Storage Optimization -** Managed petabyte-scale Azure Blob Storages and Disks, implementing lifecycle management policies that ensured 100% backup compliance and data redundancy across Australia Zones.
- **Network Security -** Configured Network Security Groups (NSGs) and VNET peering for critical environments, effectively segmenting traffic and reducing the attack surface for internal applications by 30%.
- **Cost Governance -** Monitored resource utilization via Azure Cost Management, identifying underutilized resources and preventing budget overruns by resizing or decommissioning VMs, ensuring monthly spend remains within targets**.**
- **Access Control -** Administered Microsoft Entra ID (Azure AD) for user onboarding/offboarding, enforcing Least Privilege access principles to maintain strict security compliance.

Key Achievements & Impact:

- **Disaster Recovery Remediation -** Led the critical remediation of 100+ Azure VMs for Azure Site Recovery(ASR); collaborated with Microsoft engineering to resolve replication failures, achieving 100% DR compliance.
- **Cost Optimization -** Executed a proactive governance initiative to identify and remove orphaned Azure disks, directly resulting in **$20K+ AUD savings** in storage costs.
- **Infrastructure Modernization -** Orchestrated the migration of **100+ Basic Load Balancers to Standard Load Balancers**, enabling advanced diagnostics and strengthening security compliance for enterprise workloads.
- **Automation Success -** Drove Infrastructure as Code(IaC) adoption by building Terraform modules and PowerShell scripts, reducing manual provisioning effort by **30%.**
- **Performance Recognition -** Awarded "Star Performer" & "Quarter Performer" for successful process improvements and consistent service delivery.
- **Monitoring & Observability -** Implemented proactive monitoring solutions with Azure Monitor, Log Analytics, Splunk, and Snow integration. Reduced mean time to resolution (MTTR) by **35%** through custom alerts, standard alerts and dashboards.

Senior Azure Cloud Engineer | Wipro Technologies | Dec 2025 – Present

Core Responsibilities:

- **Team Collaboration -** Coordinate a team of **12 engineers** in daily operations, handling Major Incident (P1/P2) resolution and Root Cause Analysis(RCA) preparation to improve SLA adherence.
- **Cloud Governance & Identity -** Manage RBAC and IAM via Microsoft Entra ID (formerly Azure AD), including SPN creation, App registrations, and policy configurations to enforce strict access controls.
- **Network Administration -** Architect and maintain secure network topologies using NSG, ASG, VNet Peering, Route Tables, App Gateways, WAF, and ExpressRoute circuits.

- **Security & Compliance -** Enhanced security posture by implementing Microsoft CSPM recommendations and eliminating public access to Azure Storage Accounts by enforcing private endpoints.
- **Operations & Reliability -** Manage Azure Infrastructure (VM Scale Sets, ARM templates, Web Apps) ensuring **99.9% uptime**; oversee Backup & DR policies (Azure Site Recovery, Recovery service Vaults) for business continuity
- **DevOps & CI/CD -** Accelerated deployment via Azure DevOps and reduced rollback incidents by configuring Azure DevOps build agents, implementing automated testing, and designing release strategies (blue/green, canary) for enterprise workloads.
- **Documentation & Runbooks -** Authored detailed runbooks, architecture diagrams, and operational procedures for Azure workloads, reducing onboarding time for engineers by **20%** and improving incident response consistency.
- **Root Cause Analysis (RCA)** for all critical outages, implementing preventative fix-actions that reduced recurring incidents by 20% quarter-over-quarter.

Technical Skills

- **Cloud Infrastructure -** Azure Compute (VMs, VMSS, Web Apps), Azure Storage Account, Azure Event Hub Namespace, Azure Monitor, Kubernetes, Containerization.
- **Cloud Networking** - NSG, ASG, Load Balancers (Standard/Basic), App Gateway, WAF, ExpressRoute, VNet Peering, Azure Firewall.
- **DevOps & Automation -** Infrastructure as Code (Terraform), PowerShell Scripting, Azure DevOps (Pipelines, Repos, Boards), GitHub repo management, Azure Automation Account, Resource Graph Explorer.
- **Security & Identity -** Microsoft Entra ID (RBAC, PIM, SPN), Microsoft CSPM, Azure Policy, Private Endpoints, Conditional Access policy, Zero Trust Security, MS Graph.
- **Observability -** Azure Monitor, Log Analytics, Azure Site Recovery, Backup Vaults, Splunk, Service Now Dashboard.
- **IT Management -** ITIL V4, Incident/Change/Problem Management, Scrum/Agile, SLA Management.

Certifications

- Microsoft Certified: Azure Administrator (AZ-104)
- Microsoft Certified: Azure Networking (AZ-700)
- Microsoft Certified: Azure Security Engineer (AZ-500)
- AWS Certified: Cloud Practitioner (CLF)
- Microsoft Certified: Azure Fundamental (AZ-900)
- Course Completion: Azure DevOps (AZ-400)

Education

M.Tech in Computing Systems & Infrastructure |Nov 2025
BITS Pilani University, 7.5 CGPA.
Project: Automated Email Notification for Expiry Service Principal using Azure Automation.

1. Developed a PowerShell runbook in Azure Automation Account to scan all Service Principals (SPNs) in Microsoft Entra ID (Azure AD).
2. Identified credentials (secrets and certificates) nearing expiration and generated a CSV report for audit tracking.
3. Integrated Microsoft Graph API for tenant-wide queries and SendGrid/Sendmail for proactive HTML email notifications to application owners.
4. Enhanced cloud security and reliability by preventing downtime and incidents caused by expired credentials.
5. Tools & Technologies: Azure Automation, Microsoft Graph, PowerShell, SendGrid, Entra ID, CSV Reporting, Email Notification Systems.
